EASTWOOD ELEMENTARY SCIENCE CLUB

ROCKETRY!

You'll pop your top experimenting with flying, bursting film canisters that work through chemistry. Learn why things bubble, fizz and react as we explore the science of chemistry. Students will make and launch Acid Base Bottle Rockets and Water Bottle Rockets – some will rise as high as 100 ft! They will investigate the differences behind how air pressure and chemical reactions work to propel an object into the sky. Students will also make paper straw rockets where they will learn about the force and trajectory necessary to get a rocket into space. This class is sure to be filled with high flying fun!

Students Will Make Their Own Chemical and Water Bottle Rockets

Class Dates:
Mondays
Jan. 27; Feb. 3, 24, Mar. 2
2:30-3:30PM

Class Meets in the Multi-Purpose Room

$55 for 4 Classes ($2 Processing Fee)
